**ZIPAIR to launch a new flight operation
on the Narita-Kuala Lumpur route on October 20, 2026!**

ZIPAIR (IATA code: ZG) will launch a new flight operation on the Narita-Kuala Lumpur route on Tuesday, October 20, 2026. This route will be the airline’s scheduled route, following the Narita-Houston route launched in March 2025. With this new service, the total number of airlines connecting Narita Airport and Kuala Lumpur International Airport will grow to five, further expanding the air network to Kuala Lumpur.

In recent years, demand for travel for tourism or business between Japan and Malaysia has been strong. In addition, while demand for travel from Japan to Malaysia for educational purposes, such as studying abroad, continues to grow, the number of visitors from Malaysia to Japan reached a record high in 2025, with the year-over-year growth rate ranking first among ASEAN countries[※]. With this airline launching a new service to a market expected to continue growing, it is anticipated that people-to-people exchanges between the two countries will be further vitalized.

Furthermore, the flight schedule for this route features an evening departure from Narita and a late-night departure from Kuala Lumpur. This service not only offers convenient travel times for visitors to Japan but also provides a highly convenient schedule for customers departing from Japan, allowing them to maximize their time in Malaysia. As a Japanese LCC offering affordable rates and a free, high-speed, in-flight Wi-Fi service, the airline will become a new option for customers.

We invite you to take this opportunity to experience the international flight network at Narita Airport, which is becoming even more convenient.
