 Narita International Airport Corporation

## Air Incheon to Launch New Narita-Incheon Freighter Service!

Tokyo, 15 April 2014: We are delighted to announce the launch of a new freighter service between Narita and Incheon to be operated by Air Incheon (IATA Code: KJ) from Monday, 21 April 2014.

Air Incheon is South Korea's first freighter airline which began operating in March 2013. Until now, it has provided short-haul services to the Russian Far East, Mongolia, China and other East Asian destinations, mainly using narrow-body freighter aircraft (typically B737), and has specialized in transporting small-size freight.

The launch of this new Narita-Incheon service is expected to result in the establishment of a stable transport network linking Japan and South Korea and to stimulate greater flow of air freight between the two countries.

→ Flight Schedule: 6 flights/week (every day except Sunday) from 21 April 2014

	Flight	Departure	STD	Arrival	STA
