## PCR Testing Center to Open at Narita International Airport - Negative PCR test certificates as quick as 2 Hours -

Nippon Medical School Foundation and Narita International Airport Corporation (NAA) is opening the Narita International Airport PCR Center on November 2, to provide negative PCR test certificates for customers in a minimum of 2 hours. Narita International Airport is the first airport in Japan with an on-the-spot PCR testing center and the entire process of the testing from registration to the issuance of the Negative PCR Test Certificates will be managed by Nippon Medical School. We are pleased to provide support and comfort for customers departing to overseas destinations by conveniently providing certificates right before their departure through this PCR Center which will contribute to the increase in international travel as well as domestic travel amidst the new Coronavirus and will facilitate economic recovery through resuming international flights.

### Main Features

#### 1. Negative PCR Test Certificates Issued in as quick as 2 Hours after Request (Except for Retesting)

The issuance of the certificate may take at least 6 hours until the end of November when the testing laboratory facilities will be ready to serve in its full capacity

#### 2. Testing is available without appointment and is able to respond to sudden travel needs.

#### 3. Certificates can be issued for tests carried out at Nippon Medical School Hospitals (\*1) and facilities as well as other medical institutions (\*2) .

#### 4. Tests are available to anyone with no symptoms who wish to confirm that they are not affected.

#### 5. The certificates will be issued in English and Japanese and is based on the format specified by the Ministry of Foreign Affairs of Japan (\*3).

### PCR Testing

- The PCR Center will carry out the tests with a combination of the fully-automated gene analysis system "GENECUBE" using RT-PCR and the real-time RT-PCR-based "SARS-CoV-2 Detection Kit -Multi-".
- The certificates meet requirements of a large number of countries around the world. Verification of such requirements for your destination's government will be conducted at time of registration.

"GENECUBE" fully-automated gene analysis system

\*1: Nippon Medical School Hospital, Musashi Kosugi Hospital, Tama Nagayama Hospital, Chiba Hokuso Hospital, Respiratory Care Clinic, Tokyo (appointment required, additional cost)

\*2 Referral and results from testing institution must be brought with you.

\*3 If you have a form specified by your destination's government, please bring it with you.
