## United Airlines to launch a new flight operation on the Narita-Chicago route on October 25, 2026!

United Airlines (IATA code: UA) will launch a new scheduled-flight operation on the Narita-Chicago route on Sunday, October 25, 2026.

This route will become the airlines' sixth North American route to and from Narita. With the airline's extensive domestic network of flights to and from Chicago, access from Narita Airport to cities in the central and eastern U.S. will improve. Additionally, for passengers traveling from Chicago, connections to the six routes that the airline operates to Asia and Micronesia will become more convenient.

Chicago is a representative city of the Midwestern U.S. It is a very attractive city that offers a dynamic urban skyline filled with skyscrapers, as well as local cuisine, such as deep-dish pizzas, and beautiful scenery along Lake Michigan, making it a charming destination that strikes a balance between urban life and nature. In addition, it is home to teams in all four major North American professional sports leagues (baseball, basketball, American football, and ice hockey), offering diverse sporting events to enjoy throughout the year.

We invite you to take advantage of Narita Airport's enhanced network through United Airlines' further expanded network to North America.
