Thai Vietjet Air to launch a new Narita-Bangkok (Suvarnabhumi) daily nonstop flight service on February 2, 2026

Thai Vietjet Air (IATA code: VZ) will launch a new Narita-Bangkok (Suvarnabhumi) daily nonstop flight service on February 2, 2026. The flight is planned to be operated by the new-generation Boeing 737 MAX 8, allowing travelers to experience a comfortable air journey on the latest state-of-the-art aircraft at an affordable price.

This route provides convenient access to central Bangkok via Suvarnabhumi International Airport, as well as easy flight transfers beyond and behind Bangkok. As the Narita arrival flight departs Bangkok late at night and it arrives in Narita early in the morning, this can help travelers returning to Japan from Thailand or departing Thailand to Japan to maximize their stay on their departure or arrival day.

As the capital of Thailand, Bangkok is one of Southeast Asia's premier metropolises, where historic temples and traditional culture harmonize with the energy of the large city.

With this new launch of Thai Vietjet Air, Bangkok, a city filled with attractive features, is now more conveniently accessible. We invite you to take advantage of the enhanced network at Narita Airport.
